Exploration and Mining Geology

Volume 16, Nos. 1–2, January–April 2007

Contents

 Papers

M. Doggett and J. Zhang

1 Production trends and economic characteristics of Canadian gold mines

A. Zarasvandi, S. Liaighe, M. Zentilli, and P.H. Reynolds

11 40Ar/39Ar geochronology of alteration and petrogenesis of porphyry copper-related granitoids in the Darreh-Zereshk and Ali-Abad area, central Iran

I. Dimitrov and S.R. McCutcheon

25 Stratigraphic and structural constraints on limestone exploration: A case study from northern New Brunswick, Canada

I.M. Platten and S.C. Dominy

37 Fine-grained quartz formed by the sedimentation of hydrothermal precipitates in mineral veins: An example from Tyndrum, Scotland, UK

67 Geophysical case study of the Gallen deposit, Québec, Canada

A.H. Mumin, S.D. Scott, A.K. Somarin, and K.S. Oran

83 Structural controls on massive sulfide deposition and hydrothermal alteration in the south Sturgeon Lake caldera, northwestern Ontario

C.R. Stanley

109 The fundamental relationship between sample mass and sampling variance in real geological samples and corresponding statistical models

I Author index for volume 16

II Guide for authors
